2027 BATCH · OFF-CAMPUS HIRING

TCS NQT Complete Guide

Exam pattern, syllabus, roles, packages, eligibility and rules for NQT Foundation + Advanced, in one place.

Ninja | Digital | Prime | Foundation | Advanced | Coding

191	2	0	2
minutes total	parts: A and B	negative marking	coding problems

Exam Pattern

TCS NQT has two parts. Foundation (Part A) is required for all roles. Advanced (Part B) decides Digital and Prime.

Section	Questions	Time	Level
PART A · FOUNDATION SECTION (76 min)			
Numerical Ability	20	25 min	Moderate
Reasoning Ability	20	25 min	Moderate
Verbal Ability (2027 updated)	25 + tasks	26 min	Moderate
PART B · ADVANCED SECTION (115 min)			
Advanced Quantitative + Reasoning	14	25 min	High
Advanced Coding (Easy ~35 min + Medium ~55 min)	2	90 min	Easy + Medium
TOTAL	**81+**	**~191 min (3 hr 11 min)**	

Some older sheets show Verbal as 25 min and total as 190 min. The updated 2027 Verbal pattern adds up to 26 min, which gives about 3 hr 11 min.

Exam Rules

No section switching
Once a section ends you cannot return to it.

Question switching allowed
Move between questions inside the same section.

No negative marking
Attempt every question. A guess costs nothing.

Section-wise timer
Each section has its own countdown.

Rough paper allowed
Keep a pen and blank sheets ready.

Original Govt ID checked
Carry the original, not a photocopy.

TITA questions
"Type In The Answer": no options, you type the value.

Two coding problems
One Easy, one Medium, 90 min shared.

Part A · Foundation Syllabus

01 NUMERICAL ABILITY

QUESTIONS	TOTAL TIME	PER QUESTION	DIFFICULTY
20	**25 min**	**~75 sec**	**Moderate**

Number System · LCM & HCF · Percentages · Profit & Loss · Time, Speed & Distance · Time & Work · SI & CI · Averages · Ratio & Proportion · Probability · P & C · Mensuration · Ages · Mixtures

02 REASONING ABILITY

QUESTIONS	TOTAL TIME	PER QUESTION	DIFFICULTY
20	**25 min**	**~75 sec**	**Moderate**

Series · Coding – Decoding · Blood Relations · Directions · Seating Arrangements · Syllogisms · Analogies · Odd One Out · Clock & Calendar · Ranking · Alphabet Test · Symbol Operations

03 VERBAL ABILITY · UPDATED PATTERN 2027

TOTAL ITEMS	TOTAL TIME	EMAIL WRITING	STATUS
25 + tasks	**26 min**	**9 min**	**Newly updated**

The section is restructured into three task types: **Sentence Completion**, **Passage Recall** (memory based, the passage disappears after 30 seconds of reading) and **Email Writing**. Every sub-section is timed per question.

Sub-section	Items	Time per question
Sentence Completion	20	25 seconds
Instruction Screen	1	25 seconds
Passage Recall	4 + 4	120 s (30 s read + 90 s write)
Instruction Screen	1	15 seconds
Email Writing	1	540 seconds (9 min)

Strategy: Verbal is strictly timed per item, so practise speed. Aim for under 25 s per sentence-completion question and write emails with a fixed structure: greeting, purpose, details, action, closing.

Part B · Advanced Syllabus

04 ADVANCED QUANTITATIVE + REASONING

QUESTIONS	TOTAL TIME	PER QUESTION	DIFFICULTY
14	25 min	~107 sec	High

Data Interpretation · Set Theory & Venn Diagrams · Data Sufficiency · Syllogisms · Advanced Probability · Permutation & Combination · Partnership · Critical Reasoning · Analytical Puzzles

05 ADVANCED CODING

PROBLEMS	TOTAL TIME	SPLIT	DIFFICULTY
2	90 min	Easy ~35 · Medium ~55	Easy + Medium

Languages: **C, C++, Java, Python, Perl**. Solutions are judged on hidden test cases, so correctness and time complexity both matter.

Programming Basics
Loops, conditionals, functions, input/output, patterns, number printing, pointers and references

Arrays & Matrix
Rotation, subarrays, prefix sum, rearrangement, 2D traversal (spiral, diagonal), duplicates, kadane

Strings
Palindromes, anagrams, frequency count, substrings, pattern matching, reversal, compression, parsing

Math & Number Theory
Prime, GCD/LCM, factors, Fibonacci, sieve, modular arithmetic, base conversion, Armstrong, perfect numbers

Sorting & Searching
Bubble, selection, insertion, merge, quick sort, binary search, custom comparators, kth element

Two Pointers & Sliding Window
Pair sum, max sum window, longest unique substring, merging sorted arrays

Hashing & Maps
Frequency maps, two-sum, grouping, sets, first non-repeating element

Recursion & Backtracking
Subsets, permutations, N-Queens, tower of Hanoi, combination sum

Stack & Queue
Balanced parentheses, next greater element, expression evaluation, queue via stacks

Linked List, Trees, Graphs
Reverse list, cycle detection, tree traversals, height, BFS, DFS, shortest path basics

Greedy & Dynamic Programming
Activity selection, coin change, knapsack, LIS, LCS, grid paths (usually Medium level)

Bit Manipulation & Misc
Set bits, power of two, XOR tricks, date/time and simulation problems, edge cases

Roles & Packages

Your NQT score decides the role. Foundation alone targets Ninja. Advanced marks open Digital and Prime.

TCS Ninja

Entry role · Foundation score

Entry-level CTC

Exact figure: confirm on the official TCS Nextstep notification for your cycle.

TCS Digital

Foundation + Advanced · Digital tech

7.09 – 7.30 LPA

UG, 0–1 yr exp. PG: 7.39 – 7.60 LPA

TCS Prime

Top Foundation + Advanced scorers

9.09 – 9.30 LPA

UG, 0–1 yr exp. PG: 11.59 – 11.80 LPA

Prime & Digital CTC Table

Offer	Experience 0–1 year		Experience 1–2 years	
	UG	PG	UG	PG
Prime	9.09 – 9.30	11.59 – 11.80	9.45 – 9.66	12.05 – 12.26
Digital	7.09 – 7.30	7.39 – 7.60	7.50 – 7.72	7.82 – 8.04

All figures in LPA. Actual compensation depends on relevant work experience and job location.

Eligibility

Courses

- B.Tech / B.E
- M.Tech / M.E
- MCA
- M.Sc / M.S in any specialization

From AICTE / UGC recognized universities or colleges.

Batch

- **2027 batch:** 100% eligible (off-campus hiring)
- **2026 and 2025 batches:** depends on TCS for that cycle

How to Crack It in the First Attempt

Time per question

Section	Target
Numerical	~75 sec
Reasoning	~75 sec
Verbal sentence	25 sec
Adv. Quant+Reasoning	~107 sec
Coding	35 + 55 min

Smart tips

- No negative marking: never leave blanks.
- No section switching: finish each section before time ends.
- TITA questions: practise exact numeric answers.
- Solve the Easy coding problem fully first.
- Submit a partial solution rather than nothing.

8-Week Preparation Plan

Weeks	Focus
1–2	Numerical + Reasoning basics, topic-wise timed drills
3	Verbal: sentence completion speed, passage recall, email format
4–5	Coding fundamentals: arrays, strings, math, sorting, hashing
6	Advanced Quant + Reasoning: DI, data sufficiency, puzzles
7	Medium coding: recursion, DP basics, greedy, trees
8	Full-length mocks (191 min) and error analysis

Coming next on this platform: topic-wise timed practice, section tests and full-length NQT mock series that follow exactly this pattern, from basic to advanced.
