KNOW THE ROUND

00 Sections, Timing & Scoring

A separate email gives you the login details and the time window. The round is about **30 minutes** and is listed as "20 questions · 30 minutes". Those questions are spread over **seven speaking/listening sections (A–G)** and a **compulsory email**. It is an elimination round, but it is very trainable.

Section	You hear / see → you do	Main skill scored
A · Listening comprehension	Short audio clip → answer the question in **one complete sentence**	Listening, factual recall, sentence building
B · Conversation response	A short line from a manager, colleague or client → give a polite, professional reply	Fluency, workplace etiquette
C · Reading aloud	Read about **8 sentences** aloud at a natural pace	Pronunciation, pausing at punctuation
D · Listen & repeat	Repeat each sentence **exactly** as you heard it	Intonation, stress, auditory memory
E · Fill in the missing word	A sentence with a blank → say the **full sentence** with the right word	Grammar: agreement, tense, articles
F · Error correction	An incorrect sentence → say the **corrected** sentence	Grammar accuracy
G · Speaking on a topic	**30 s** to prepare, then **45 s** to speak	Fluency, vocabulary, structure, confidence
Email (compulsory)	Write a professional email of **at least 50 words**	Etiquette, structure, grammar, tone

Verbal parameters
Pronunciation · fluency (smooth, steady speech) · active listening · understanding of spoken English · vocabulary · articulation (clear sounds) · grammar.

Written parameters
Email etiquette (greeting, tone, sign-off) · content structure (purpose, details, action) · grammar and spelling accuracy.

How automated scoring "hears" you

Responses are usually scored by software. It compares **what** you said with the expected content, and **how** you said it (speed, pauses, clarity, stress). It cannot guess unclear words, and long silence is scored as missing content. Clear, steady and complete answers matter more than an accent.

01

LOSE NO MARKS TO THE SET-UP

Set-up & Test-Day Rules

Before the test

- Use a **headset with a microphone**; laptop mics pick up echo and fan noise.
- A quiet room: fan off, door closed, phone silent.
- Updated Chrome, stable internet, laptop charged.
- Allow camera and mic access, and do the sample/mic check.

While speaking

- Mic about **two fingers** from your mouth, slightly to the side.
- Speak at **normal conversation volume**; do not shout or whisper.
- Start speaking **right after the beep / recording cue**.
- Keep going: if you make a mistake, correct it once and continue.

Rules to respect

- Video and audio may be recorded for integrity.
- No one else in the room, no talking to others.
- Most recordings **cannot be redone**; there is no pause button.
- Read every instruction screen. Timers start automatically.

The four biggest score killers

Silence of more than 3–4 seconds · **one-word answers** in sections A and B · **speaking too fast** (the words blur together) · **background noise** or a clipped mic. Fix these four and your score rises before you improve anything else.

FOUNDATIONS

Sound Clear, Speak Smoothly, Be Correct

These three skills are scored in every spoken section. A few focused fixes make a big difference.

F1

CLEAR SOUNDS

Pronunciation: Sounds & Word Stress

Silent letters	Do not pronounce them.	de(b)t, lis(t)en, (k)now, is(l)and, We(d)nesday, recei(p)t

Word stress: say the CAPITAL syllable louder and longer

Word	Say	Word	Say	Word	Say
development	di-VEL-up-ment	hotel	hoh-TEL	colleague	KOL-eeg

present (noun)	PREZ-ent	present (verb)	pri-ZENT	Wednesday	WENZ-day

Two-syllable words that are both a noun and a verb usually stress the first syllable as a noun and the second as a verb: PROject / proJECT, OBject / obJECT, INcrease / inCREASE.

F2

SMOOTH AND NATURAL

Fluency, Pace & Intonation

Pace
About **120–150 words per minute**

Pauses
Short pause at a comma, a full stop at a full stop. Pause between word

Fillers
Avoid "umm", "aaa", "like", "basically", "you know".

Linking
Join words smoothly: "turn_it_off", "an_apple".

, calm and steady. If you are nervous, slow down a little; clarity beats speed.	groups, never in the middle of one.	Use a silent 1-second pause instead.	Do not stop after every word.

Intonation (the music of the sentence)
Falling ↘ at the end of statements and wh-questions: "The report is ready ↘." "Where is the meeting ↘?" **Rising ↗** for yes/no questions and lists before the last item: "Are you free today ↗?" "Java ↗, Python ↗ and SQL ↘."

Sentence stress
Stress the **content words** (nouns, main verbs, adjectives, numbers, negatives) and keep small words (a, the, to, of, is) light: "I **NEED** the **REPORT** by **FRIDAY**." Stressing the right words is what makes you sound fluent.

10-minute daily drill
Record yourself reading one news paragraph on your phone and play it back. Listen for blurred endings, missing -s/-ed, fillers and rushing. Next, shadow a 1-minute clip: play a sentence and repeat it immediately with the same rhythm.

A

LISTEN, THEN ANSWER IN A FULL SENTENCE

Listening Comprehension

Listen for the 5 Ws → Catch the key fact → Reuse the question's words → One complete sentence

Method

While listening, track **who, what, when, where, why**, numbers and days. Build your answer from the question: "Why has the meeting been moved?" → "The meeting has been moved **because** ...". Answer only what was asked.

Traps

"Room 4." One-word answers lose most marks. **"The meeting is in Room 4."** Do not add guesses or extra stories. If you missed a detail, still answer in a full sentence with the part you heard.

B

REPLY LIKE A PROFESSIONAL

Conversation Response

The 3-part reply

(1) **Acknowledge**: "Sure", "Of course", "I'm sorry to hear that". (2) **Answer or act**: what you will do, with a time. (3) **Optional polite extra**: an offer or a question ("Could you share the agenda?"). Aim for 1–2 complete sentences.

Phrase bank

Agree: "Certainly, I'll ..." · Decline politely: "I'm sorry, but ... However, I can ..." · Clarify: "Could you please tell me ...?" · Apologise: "I apologise for the delay; I will ..." · Thank: "Thank you, I really appreciate ..."

#	What you hear	A strong reply
1	Manager: Can you send me the project report by today?	Sure, I will share the project report with you by the end of the day.
2	Colleague: I am stuck with this Excel formula. Do you have a minute?	Of course. Please share your screen, and we can look at the formula together.
3	Client: The application is loading very slowly since yesterday.	I am sorry for the inconvenience. I will check the issue right away and update you within an hour.

#	What you hear	A strong reply
4	Manager: Can you lead the client call tomorrow at 9 a.m.?	Yes, I would be happy to lead the call. Could you share the agenda with me today so that I can prepare?
5	Colleague: Could you cover my tasks on Friday? I have a family function.	I am sorry, but I have a deadline on Friday. However, I can help you with your tasks on Thursday evening.

10	Manager: I noticed a few errors in your last report.	Thank you for pointing them out. I will correct them today and double-check my future reports before sending them.

C

READ CLEARLY AT A NATURAL PACE

Reading Aloud

Method
Use the first second to scan the sentence for difficult words and commas. Read in **word groups**, pause at punctuation, stress the content words and end statements with a falling tone. Keep a steady pace: do not race through the sentence.

Traps
Skipping or adding small words (a, the, of) · dropping -s and -ed endings · stopping mid-sentence to restart. If you trip over a word, simply continue; restarting costs more than a small slip.

Practise these. **Bold** = stressed word, | = short pause, || = longer pause.

1. Our **company** | has **offices** in more than **forty countries**, || and it **helps clients** | use **technology** to **grow.**
2. Before the **meeting starts**, | please make **sure** | that your **microphone** is **muted.**
3. The **new software** | will be **installed** on all **laptops** | by the **end** of this **week.**
4. If you have **any questions** about the **project**, | feel **free** to **contact** your **team lead.**
5. **Customer satisfaction** | is the **most important measure** | of our **success.**
6. The **training programme** | covers **cloud computing**, | **data security**, | and **artificial intelligence.**
7. Although the **deadline** was **tight**, || the **team delivered** the **product** | on **time.**
8. Please **remember** | to **submit** your **timesheet** | every **friday** | before **six p.m.**

D

EXACTLY WHAT YOU HEARD

Listen & Repeat

Method

Listen for the **meaning**, not single words; a sentence you understand is easy to rebuild. Mentally split it into 2–3 chunks ("The training session | will start | after the coffee break"). Copy the speaker's rhythm and falling tone. Start right after the beep.

Traps

Changing words ("will start" → "starts") · dropping articles and plural -s · long silence while trying to remember. Saying 90% of the sentence fluently scores better than silence.

Practise in three lengths: ask someone to read each sentence once, then repeat it.

Short (4–5+ words)

1. Please close the door.
2. The report is ready.
3. I will call you later.
4. Lunch is served at one.

Medium (6–6+ words)

1. The manager approved my leave request.
2. Our team works on a banking project.
3. Could you send me the meeting link?
4. The client visit has been postponed.

Long (9–12+ words)

1. The training session will start after the coffee break.
2. Most employees prefer working from the office on Mondays.
3. Please update the document before you share it with the client.
4. Our new office in Pune has a large cafeteria and a gym.

E

30 S TO PREPARE, 45 S TO SPEAK

Speaking on a Topic

Opening: your view in one line → **Point 1 + reason / example** → **Point 2 + reason / example** →

Closing: sum up in one line

Use the 30 seconds
Write 3 keywords only: your view, point 1, point 2. Do not write sentences. Think of one real example from college, projects or internships.

Linkers that sound fluent
In my opinion · Firstly · For example · Moreover · On the other hand · However · That is why · In conclusion / To sum up.

Timing
45 seconds is about **90–100 words** at a calm pace. Keep speaking until the timer ends. If you finish early, add one more example rather than stopping.

G1 Work from home or work from office: which is better?

91 words ≈ 45 s

30-second prep notes

- View: a hybrid model works best
- Home: saves travel time, fewer distractions
- Office: teamwork, faster learning for freshers

In my opinion, a hybrid model is the best option. Working from home saves a lot of travel time and helps people focus on tasks that need deep concentration. However, the office has its own advantages. When we sit together, we solve problems faster, and freshers learn much more by watching experienced colleagues. Informal conversations also build trust in a team. So, I believe two or three days in the office and the rest at home gives us the best of both worlds. It keeps productivity high and the team connected.

G2 The role of technology in education

87 words ≈ 45 s

30-second prep notes

- View: technology has made learning open to everyone
- Online courses and videos for any topic
- Needs balance: screen time and discipline

Technology has completely changed the way we learn. Today, a student in a small town can watch lectures from the best teachers in the world, often for free. Online courses, videos and practice platforms let us learn at our own pace and revise whenever we want. During my own preparation, I used coding websites to practise every day. However, technology also brings distractions, so self-discipline is very important. In conclusion, technology is a powerful tool for education, as long as we use it with a clear goal.

G3 Your biggest strength

89 words ≈ 45 s

30-second prep notes

- Strength: I learn new things quickly
- Example: learned React in two weeks for a college project
- Why it matters in IT

My biggest strength is that I learn new things quickly. For example, in my final year, our team needed a web interface for our project, but none of us knew React. I took the responsibility, followed online tutorials and built the first version within two weeks. Later, I also helped my teammates understand the code. In the IT industry, technologies change very fast, so the ability to learn quickly is extremely valuable. I believe this strength will help me adapt to any project and contribute from the first day.

G4 Why is teamwork important?

92 words ≈ 45 s

30-second prep notes

- View: big goals need many skills
- Example: college hackathon
- Teams share load and ideas

Teamwork is important because most real projects are too big for one person. A software product needs developers, testers, designers and business analysts working together. When people with different skills share ideas, the final result is much better. I experienced this during a college hackathon, where our team of four built a working app in twenty-four hours. We divided the work according to our strengths and supported each other when someone was stuck. Good teamwork also reduces stress, because the workload is shared. That is why companies value team players so much.

G5 Social media: a boon or a bane?

94 words ≈ 45 s

30-second prep notes

- View: both, depends on how we use it
- Boon: connection, learning, opportunities
- Bane: addiction, fake news

I think social media is both a boon and a bane, and it depends on how we use it. On the positive side, it connects people across the world, helps small businesses reach customers and gives us access to useful information. Platforms like LinkedIn also help students find internships and jobs. On the negative side, too much social media can become addictive, waste our time and spread fake news very quickly. So, the key is balance. If we use it with purpose and check facts before sharing, social media can be a great tool.

G6 How do you handle pressure?

100 words ≈ 45 s

30-second prep notes

- Stay calm and plan
- Example: two deadlines in one week
- Break work into small tasks, communicate early

I handle pressure by staying calm and making a clear plan. When I have too much work, I first list all the tasks and decide which ones are most urgent. Then I break big tasks into smaller steps, so that I can see progress. For example, last semester I had two project submissions and an exam in the same week. I made a day-by-day schedule, finished the coding part first and asked my professor early about one doubt. I completed everything on time. I also believe in communicating early if I need help, instead of waiting until the last moment.

G7 A skill you want to learn

93 words ≈ 45 s

30-second prep notes

- Skill: cloud computing
- Why: most companies are moving to the cloud
- Plan: certification + projects

One skill I really want to learn is cloud computing. Today, most companies are moving their applications and data to cloud platforms like AWS, Azure and Google Cloud, so cloud skills are in very high demand. I have already studied the basics, such as virtual machines and storage, and now I plan to complete a beginner certification. I also want to deploy one of my college projects on the cloud, because practical experience is more valuable than theory. I believe this skill will make me a stronger engineer and open many career opportunities.

G8 The importance of time management

93 words ≈ 45 s

30-second prep notes

- View: time is the one resource we cannot get back
- Plan the day, prioritise
- Example: placement preparation

Time management is important because time is the one resource we can never get back. People who manage their time well finish their work on time, feel less stressed and still have time for family and health. A simple method is to plan the day in the morning and do the most important task first. During my placement preparation, I divided my day into fixed slots for aptitude, coding and communication practice. This routine helped me stay consistent. In short, good time management is the foundation of success in both studies and work.
