13 Frequently asked questions

14 One-page revision sheet

How to use this guide

- **Never heard of a psychometric test?** Read Sections 1–7 in order. They build your understanding step by step.
- **Already know the basics?** Skip to Section 6 (consistency checks) and Section 7 (golden rules), then do the practice sets.
- **Exam tomorrow?** Read Section 14, the one-page revision sheet, and do Practice Set 1.

An honest word before you start

This guide does **not** teach you to fake a personality. Faking is risky: the test is designed to catch it, and the interviewer may later ask about the same traits. Instead, this guide teaches you to **understand what each question is really asking**, to **answer as your best professional self**, and to **stay consistent**. That is exactly what companies want to see.

THE BASICS

01 What Is a Psychometric Test?

"Psycho" means mind and **"metric"** means measurement. A psychometric test measures **how you think, behave and react** in different situations. It is not about knowledge, so you can't study facts for it the way you would for a technical test.

The **behavioural** (personality) part asks you to rate statements about yourself, such as *"I enjoy working with people from different backgrounds."* Your answers build a **personality profile**. The company then compares that profile with the qualities it wants in its employees.

Why do companies like Accenture use it?

Culture fit
Will you work well in large, diverse, client-facing teams?

Work style
Are you reliable, adaptable and willing to learn new technologies fast?

Scale
It's a fair, quick way to understand thousands of freshers before the interview.

Myths vs Facts

Myth ×	Fact ✓
"There are no right answers, so I can click anything."	There are no *correct* answers, but there are clearly **unsuitable** ones, such as agreeing that rules can be ignored. Careless clicking also creates inconsistencies.
"I should pick Strongly Agree for every positive statement."	An "all extreme" pattern looks unrealistic and can flag your profile as **socially desirable responding** (trying too hard to look good).
"It's not an elimination round, so it doesn't matter."	Candidates report no direct elimination, but your profile may still be used alongside other results. Treat it seriously. It takes only 20 minutes.
"I need to study psychology for this."	No. You only need to understand the **traits** being measured and the **question patterns**. This guide covers both.
"Neutral is the safest answer."	Choosing Neutral too often makes you look indecisive and gives the test little information. Use it rarely.
"Admitting any weakness will hurt me."	Small, honest admissions (like feeling nervous before big tasks) make your profile **believable**. Nobody is perfect, and the test knows that.

02

KNOW YOUR EXAM

The Accenture Behavioural Round at a Glance

QUESTIONS	DURATION	TIME PER QUESTION	ELIMINATION
54	**20** min	**~22** sec	**Not reported**

- It is **Part A of Assessment 1**. It is followed by the 20-minute Gamified Cognitive test (3 games), which **is** an elimination round.
- You will see **personality-based situational statements** rated on an **agree / disagree scale**.
- Statements cover **workplace behaviour, teamwork, integrity and adaptability**.
- The test includes **consistency checks**: the same trait is asked in different ways at different points.

Why it still matters

Even if this round doesn't eliminate anyone by itself, it is your first impression on the platform. A calm, consistent performance here also sets a good rhythm for the gamified round straight after it.

RECOGNISE THE PATTERN

03 Question Formats You Will See

The main Accenture format is the **agree/disagree statement**. It's still worth knowing the other two common formats, because psychometric tests often mix them.

Format 1 · Main **Self-rating statement (Likert scale)**

You read a statement about yourself and choose how much you agree.

"I stay calm when deadlines are tight."
Strongly Disagree · Disagree · Neutral · Agree · Strongly Agree

Format 2 **Situational statement**

A workplace situation is described, and you rate how likely you are to react in a given way.

"If a teammate is struggling with their task, I would offer to help even if it's not my responsibility."

Format 3 **Forced choice (most / least like me)**

You see 2–4 statements that all sound positive, and you must pick the one that is **most** (or least) like you. This makes faking hard, so just pick what is truly closest to you.

A. I plan my work in detail · B. I enjoy meeting new people · C. I like solving difficult problems

THE MOST IMPORTANT SKILL

04 Understanding the Answer Scale

SD	D	N	A	SA
Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree

Every statement is either **positive** (it describes a good workplace quality) or **negative** (it describes a weak or risky quality). Your first job is to tell which kind it is.

Statement type	Example	Best response zone
Core positive integrity, ownership, teamwork	"I always complete the work I have committed to."	SD D N A SA Strongly Agree or Agree

Statement type	Example	Best response zone
Mild positive nice to have, depends on person	"I enjoy being the centre of attention in a group."	SD D **N** **A** SA Agree, or Neutral if it's true for you
Core negative dishonesty, rule-breaking	"It's okay to bend the rules if no one finds out."	**SD** **D** N A SA Strongly Disagree
Mild negative normal human weakness	"I get irritated when plans change suddenly."	**SD** **D** N A SA Disagree
Honesty check "never" / "always" claims	"I have never been late for anything in my life."	SD **D** **N** A SA Disagree, because nobody is perfect

The 3-second method

1. **Spot the trait:** what quality is this statement about?
2. **Spot the direction:** is it positive or negative for a professional?
3. **Pick the strength:** use "Strongly" only for core values (integrity, ownership, teamwork). Use plain Agree or Disagree for the rest.

05

WHAT'S REALLY BEING MEASURED

The Traits Being Measured

Most personality tests are built on the **Big Five** model of personality. Companies then map it to workplace qualities. Learn these once and you will recognise almost every statement.

The Big Five (OCEAN), made simple

Trait	What it means	What a workplace profile usually shows
Openness	Curiosity, open to new ideas and learning	**High:** eager to learn new tech and comfortable with change
Conscientiousness	Organised, responsible, careful, hard-working	**High:** the most valued trait for freshers (meets deadlines, checks work)
Extraversion	Social energy, talkative, assertive	**Moderate to high:** comfortable with people. You don't need to be the loudest.
Agreeableness	Cooperative, kind, helpful, trusting	**High, but balanced:** helpful and polite, yet able to disagree respectfully
Neuroticism	Stress, anxiety, mood swings	**Low:** calm under pressure, handles criticism well

The 8 workplace traits that matter for IT services

1 · Teamwork & Collaboration

Looks like: shares credit, helps teammates, values other opinions.

Red flag: "I prefer to work alone", "Others slow me down".

"I enjoy working with people who think differently from me." → **Agree / Strongly Agree**

2 · Adaptability & Flexibility

Looks like: handles changing requirements, new tools, new locations.

Red flag: "I dislike change", "I need a fixed routine".

"I am comfortable when my task changes at short notice." → **Agree**

3 · Integrity & Ethics

Looks like: honest, follows rules, admits mistakes.

Red flag: any agreement with lying, cheating or hiding errors.

"I would report a mistake even if no one else noticed it." → **Strongly Agree**

4 · Ownership & Dependability

Looks like: finishes what they start, meets deadlines, takes responsibility.

Red flag: blaming others, leaving tasks half done.

"When I commit to a deadline, I make sure I meet it." → **Strongly Agree**

5 · Learning Agility

Looks like: enjoys learning, asks questions, picks up new skills fast.

Red flag: "I only like doing what I already know".

"I enjoy learning new technologies on my own." → **Strongly Agree**

6 · Resilience & Stress Handling

Looks like: stays calm, recovers from failure, accepts feedback.

Red flag: "Criticism upsets me for days", "I panic under pressure".

"I see negative feedback as a chance to improve." → **Agree / Strongly Agree**

7 · Client & Quality Focus

Looks like: cares about the end user, checks work, pays attention to detail.

Red flag: "Good enough is fine", "Details don't matter".

"I double-check my work before submitting it." → **Strongly Agree**

8 · Communication & Initiative

Looks like: speaks up, asks for help early, suggests ideas.

Red flag: "I keep problems to myself", "I wait to be told what to do".

"If I am stuck, I ask for help instead of wasting time." → **Agree**

WHERE MOST PEOPLE SLIP

06 Consistency Checks & Trap Statements

The test asks about the **same trait several times**, worded differently and spread across the test. If your answers contradict each other, your profile is marked **inconsistent**, which is one of the few real ways to perform badly here.

How a consistency cluster works

Here are three statements that all measure **teamwork**. They might appear as question 5, question 23 and question 47:

Q	Statement	Direction	Consistent answer
5	"I enjoy working as part of a team."	Positive	SD D N **A** **SA**
23	"I get more done when I work alone than with others."	Reversed	SD **D** **N** A SA
47	"When my team succeeds, I feel it is my success too."	Positive	SD D N **A** **SA**

The common mistake

A candidate who answers **Strongly Agree** to Q5 but also **Agree** to Q23 has contradicted themselves. The test notices this pattern.

Reverse-keyed statements: read every word

A **reversed** statement describes the *opposite* of a good trait, so the good answer is **Disagree**. Watch for these words:

not · rarely · avoid · dislike · find it difficult · prefer to work alone · get upset · put off

"I **rarely** finish tasks before the deadline."
→ This is about **ownership**, reversed. Answer **Disagree**.

"I find it **difficult** to adjust to new teams."
→ This is about **adaptability**, reversed. Answer **Disagree**.

The "too good to be true" trap (lie-scale items)

Some statements describe **perfect behaviour that no real human has**. They test whether you are answering honestly or just trying to look good. If you strongly agree with all of them, your whole profile may be treated as less believable.

Trap statement	Smart answer
"I have **never** told even a small lie."	SD **D** N A SA Disagree
"I **always** like everyone I meet."	SD **D** N A SA Disagree
"I have **never** felt angry at anyone."	SD **D** N A SA Disagree
"I **sometimes** feel nervous before an important task."	SD D **N** **A** SA Agree is fine, because it's normal

Rule of thumb

Words like **"never"**, **"always"**, **"everyone"** and **"in my whole life"** next to a perfect behaviour are a signal. Real people are good *most* of the time, not *all* of the time.

07 REMEMBER THESE

The 12 Golden Rules

1. **Be your best professional self**
   Answer as the person you are at your best at work or college, not on a lazy Sunday.
2. **Stay consistent**
   Decide your "stand" on each trait once, and keep it every time that trait appears.
3. **Read every word**
   "Not", "rarely" and "avoid" flip the meaning. Most mistakes come from skim-reading.
4. **Integrity is non-negotiable**
   Always strongly reject lying, cheating, hiding mistakes or bending rules.
5. **Avoid the all-extreme pattern**
   Mix Agree and Strongly Agree. Save "Strongly" for core values.
6. **Limit Neutral**
   Use it rarely, only when you truly don't lean either way. Aim for fewer than 5 out of 54.
7. **Don't claim perfection**
   Disagree with "I have never..." and "I always..." claims of perfect behaviour.
8. **Team over ego**
   Prefer collaboration, shared credit and helping others, while still owning your own work.

9 **Welcome change**
Agree with flexibility: new tasks, new tools, relocation, shifting priorities.

10 **Show calm, not anxiety**
Disagree with panic, stress-outs and taking feedback personally.

11 **Trust your first instinct**
You get about 22 seconds per question. Overthinking leads to inconsistency.

12 **Answer every question**
Skipped or timed-out items weaken your profile. Never leave any blank.

The balanced profile you are aiming for

Trait	Target level	One-line description
Integrity	Very high	Honest, ethical, follows rules, admits mistakes
Ownership / Dependability	Very high	Finishes what they start and meets deadlines
Teamwork	Very high	Cooperative and helpful, values others
Learning agility / Openness	High	Curious, picks up new technology fast
Adaptability	High	Comfortable with change and uncertainty
Calmness / Resilience	High	Handles pressure and feedback well
Sociability / Assertiveness	Moderate to high	Comfortable with people. Doesn't need to dominate.

PRACTICE SET 1

08 40 Statements with Recommended Answers

Cover the right two columns, answer each statement yourself, then compare. Dark green or red marks the best answer. Light shading marks another acceptable answer.

#	Statement	Recommended	Trait · Why
1	I enjoy working as part of a team.	SD D N **A** **SA**	Teamwork
2	I prefer to complete tasks alone rather than with others.	SD **D** **N** A SA	Teamwork · reversed
3	I double-check my work before submitting it.	SD D N **A** **SA**	Quality focus
4	It's acceptable to bend company rules if it helps finish work faster.	**SD** **D** N A SA	Integrity · core
5	I feel uncomfortable when my work plan changes suddenly.	**SD** **D** N A SA	Adaptability · reversed
6	I enjoy learning new tools and technologies.	SD D N **A** **SA**	Learning agility
7	When I make a mistake, I inform my lead immediately.	SD D N **A** **SA**	Integrity · ownership
8	I often put off difficult tasks until the last minute.	**SD** **D** N A SA	Conscientiousness · reversed
9	I stay calm when working under tight deadlines.	SD D N **A** **SA**	Resilience
10	Criticism of my work upsets me for a long time.	**SD** **D** N A SA	Resilience · reversed
11	I have never made a mistake at work or in college.	**SD** **D** N A SA	Lie-scale · too perfect
12	I like taking responsibility for important tasks.	SD D N **A** **SA**	Ownership
13	I am willing to relocate for work if needed.	SD D N **A** **SA**	Adaptability · PAN-India role
14	I respect opinions that are different from mine.	SD D N **A** **SA**	Teamwork · diversity
15	I keep my problems to myself rather than ask for help.	**SD** **D** N A SA	Communication · reversed
16	I enjoy being the centre of attention.	SD D **N** **A** SA	Extraversion · mild, be honest
17	I plan my day before I start working.	SD D N **A** **SA**	Organisation
18	Taking credit for a teammate's idea is fine if it helps my career.	**SD** **D** N A SA	Integrity · core
19	I sometimes feel nervous before important presentations.	SD D **N** **A** SA	Honesty · normal feeling

#	Statement	Recommended	Trait · Why
20	I find it easy to start conversations with new people.	SD D N **A** **SA**	Sociability
21	Once I start something, I finish it.	SD D N **A** **SA**	Ownership
22	I get bored doing the same kind of work for long.	SD **D** **N** A SA	Tricky · avoid both extremes
23	I prefer clear instructions before starting a task.	SD D **N** **A** SA	Fine to agree · not "Strongly"
24	I can work effectively even when instructions are unclear.	SD D N **A** **SA**	Adaptability
25	Following procedures is a waste of time.	**SD** **D** N A SA	Discipline · reversed
26	I like helping teammates even when it's not my task.	SD D N **A** **SA**	Teamwork · agreeableness
27	I lose my temper easily when things go wrong.	**SD** **D** N A SA	Emotional stability
28	I set personal goals and track my progress.	SD D N **A** **SA**	Drive
29	I prefer sticking to methods that have always worked.	SD **D** **N** A SA	Openness · mildly reversed
30	I speak up in meetings when I have a useful idea.	SD D N **A** **SA**	Initiative
31	I always agree with my seniors, even when I think they're wrong.	SD **D** N A SA	Respectful assertiveness
32	I handle multiple tasks at the same time without losing track.	SD D N **A** **SA**	Organisation
33	If no one checks my work, I don't need to be careful.	**SD** **D** N A SA	Integrity · quality
34	I enjoy solving difficult problems.	SD D N **A** **SA**	Problem solving
35	I worry a lot about things that may go wrong.	**SD** **D** N A SA	Anxiety · reversed
36	I treat everyone with respect, whatever their role.	SD D N **A** **SA**	Respect · inclusion
37	I am comfortable working late occasionally to meet a deadline.	SD D N **A** **SA**	Commitment
38	I get along with every single person I have ever met.	SD **D** **N** A SA	Lie-scale · too perfect
39	I see feedback as an opportunity to grow.	SD D N **A** **SA**	Growth mindset
40	I find it hard to trust my teammates with important work.	**SD** **D** N A SA	Trust · teamwork reversed

Notice the pattern in this answer key

Even the "ideal" answers are not all Strongly Agree. Out of 40, only about 15 are "Strongly" answers, several are plain Agree or Disagree, and a couple sit at Neutral. This is what a **believable, balanced** profile looks like.

PRACTICE SET 2

09 Situational Judgement Practice

These scenarios train you to think like a professional. Even when the real test uses only an agree/disagree scale, the same thinking tells you which statements to agree with. The best answer is highlighted.

1. You notice a bug in code you submitted yesterday. Nobody else has noticed it yet. What do you do?

A Stay quiet. If no one finds it, it's not a problem.

B Fix it silently without telling anyone.

C Inform your lead, explain the impact, and fix it quickly.

D Wait to see if testing catches it.

Why C: it shows integrity and ownership. B looks responsible, but hiding a change from the team breaks transparency.

2. A teammate keeps missing their part of the work, which delays the whole team.

A Complain about them to the manager straight away.

B Talk to them privately, understand the issue, and offer help. Escalate only if it continues.

C Do their work yourself without saying anything.

D Ignore it, because it's not your problem.

Why B: it balances empathy, teamwork and responsibility, and keeps escalation as a sensible next step.

3. Your manager assigns you a technology you have never used, with a one-week deadline.

A Say it's not your skill and ask for a different task.

B Accept, make a quick learning plan, use documentation and colleagues, and share progress early.

C Accept and quietly hope you figure it out.

D Accept but ask for the deadline to be doubled right away.

Why B: it shows learning agility, adaptability and communication. Raising a timeline risk *after* you have a plan is fine.

4. A client asks for a change late on a Friday that could affect the release.

A Make the change immediately without telling anyone.

B Refuse, because it's too late.

C Acknowledge the request politely, check the impact with your lead, and agree a realistic plan with the client.

D Reply on Monday.

Why C: it's client-focused but follows process. A risks the release, and B and D ignore the client.

5. Your senior suggests an approach you believe is less efficient.

A Follow it silently. Seniors are always right.

B Respectfully share your alternative with reasons, then go with the team's final decision.

C Use your own approach without telling them.

D Argue until they agree.

Why B: it combines respectful assertiveness with team discipline.

6. You receive harsh feedback on your first project in front of the team.

A Defend yourself strongly in the meeting.

B Listen calmly, note the points, ask clarifying questions later, and improve.

C Feel demotivated and avoid that senior.

D Ignore it, because they don't understand your work.

Why B: it shows resilience and a growth mindset.

7. You finish your tasks early. Your team is busy with a deadline.

A Log off early. You've done your part.

B Tell your lead you are free and offer to help the team.

C Start a personal side project.

D Pretend to be busy.

Why B: it shows initiative, team spirit and transparency.

8. A friend in another team asks you to share confidential client data "just for reference".

A Share it, since they're from the same company.

B Share only part of it.

C Politely refuse and explain that the data is confidential. Suggest they request access through the proper channel.

D Ignore the message.

Why C: data security and integrity are non-negotiable at an IT services company.

9. You are asked to join a project in a new city at short notice.

A Refuse, because you prefer your current location.

B Accept positively, and discuss any genuine practical concerns with HR or your lead.

C Accept, then look for another job.

D Delay your answer as long as possible.

Why B: it shows adaptability, which matters for a PAN-India role, and honest communication.

10. You are stuck on a problem for two hours and the deadline is close.

A Keep trying alone. Asking makes you look weak.

B Summarise what you've tried and ask a teammate or lead for guidance.

C Submit incomplete work without saying anything.

D Copy a solution from the internet without understanding it.

Why B: asking early, with context, is professional. It saves time and shows ownership.

PRACTICE SET 3

10 Consistency Drill

Each group below measures **one trait** with different wording. Answer all items in a group the same way *in spirit*: agree with the positive ones and disagree with the reversed ones.

Group A · Ownership

a	I take full responsibility for my tasks.	SD	D	N	**A**	**SA**
b	If a task fails, it's usually due to others.	**SD**	**D**	N	A	SA
c	I follow up on my work until it is complete.	SD	D	N	**A**	**SA**

Group B · Adaptability

a	I adjust quickly to new situations.	SD	D	N	**A**	**SA**
b	I feel stressed when my routine is disturbed.	**SD**	**D**	N	A	SA
c	Change brings new opportunities to learn.	SD	D	N	**A**	**SA**

Group C · Integrity

a	Honesty matters more than results.	SD	D	N	**A**	**SA**
b	Small shortcuts are fine if the result is good.	**SD**	**D**	N	A	SA
c	I would report a colleague's unethical act.	SD	D	N	**A**	**SA**

Group D · Calm under pressure

a	I think clearly in stressful situations.	SD	D	N	**A**	**SA**
b	I panic when many things go wrong at once.	**SD**	**D**	N	A	SA
c	Pressure helps me focus on what matters.	SD	D	**N**	**A**	SA

Self-check after practice

- Did you agree with a positive item **and** its reversed partner? If so, that's an inconsistency. Re-read the reversed item slowly.
- Did you choose Strongly Agree for more than about 60% of items? If so, mix in plain Agree for non-core traits.
- Did you pick Neutral more than 4–5 times? If so, make firmer choices.

BEAT THE CLOCK

11 Time Management for 54 Questions

Checkpoint	Time used	Questions done	If you're behind
Quarter-way	5 min	~14	Stop re-reading. Trust your first instinct.
Half-way	10 min	~27	Use the 3-second method: trait, direction, strength.
Three-quarters	15 min	~41	Speed up slightly. These are the same traits again.
Finish	18–19 min	54	Leave a minute spare. Never leave anything blank.

Don't rush either

About 22 seconds is more than enough for one statement. Most candidates finish early, and the real risk is **misreading** because of speed, not running out of time.

GET READY IN A WEEK

12 7-Day Preparation Plan

Just 30–40 minutes a day is enough. You'll go into the test calm and consistent.

Day	Focus	What to do
Day 1	Understand the test	Read Sections 1–4. Learn the 5-point scale and the 3-second method.
Day 2	Learn the traits	Read Section 5. Write one real example from your life for each of the 8 workplace traits. These also help in your interview.
Day 3	Know yourself	Note your genuine strengths and weaker areas. Decide your honest, professional "stand" on each trait.
Day 4	Traps and consistency	Study Section 6. Practise spotting reversed words and "never/always" claims.
Day 5	Practice Set 1	Do all 40 statements in under 15 minutes. Compare with the key and note the patterns behind your mistakes.
Day 6	Practice Sets 2 & 3	Solve the situational questions and the consistency drill. Take a free online Big Five test to see your natural profile.
Day 7	Revise and relax	Read the 12 golden rules and the one-page revision sheet. Sleep well. Also prepare for the gamified round that follows.

YOUR DOUBTS ANSWERED

13 Frequently Asked Questions

Can I fail the behavioural test?

Candidates report no direct elimination from this part. Still, a careless or inconsistent profile is a bad first impression, and it may be used with your other results.

Should I answer 100% honestly?

Answer honestly, from your **best professional self**. Don't invent a personality, and don't share your worst habits either.

Can I go back and change answers?

Usually not. Treat every answer as final, and read carefully the first time.

Is it okay to choose Neutral?

Yes, occasionally, for statements where you genuinely don't lean either way. Overusing it looks indecisive.

What if two statements seem identical?

That's deliberate: it's a consistency check. Give the same kind of answer, unless one of them is reverse-worded.

I'm an introvert. Is that bad?

No. Many great engineers are introverts. Show that you collaborate and communicate well. You don't need to claim you love parties.

Will the interviewer see my results?

It's possible. That's another reason to answer consistently with how you'll present yourself in the interview.

What happens right after this test?

The Gamified Cognitive test (3 games in 20 min), which is an elimination round. Stay calm and keep your energy for it.

14

READ THIS BEFORE THE TEST

One-Page Revision Sheet

QUESTIONS	TIME	PER QUESTION	NEUTRAL LIMIT
54	20 min	~22 sec	< 5

Agree / Strongly Agree with

- Honesty, admitting mistakes, following rules
- Finishing tasks and meeting deadlines
- Teamwork, helping others, respecting differences
- Learning new technologies, curiosity
- Adapting to change and relocation
- Accepting feedback, staying calm
- Asking for help early, speaking up with ideas
- Checking work quality, caring about the client

Disagree / Strongly Disagree with

- Bending rules, lying, taking others' credit
- Hiding mistakes or problems
- Preferring to always work alone, distrusting the team
- Disliking change, needing a fixed routine
- Panicking, anger, being upset by criticism
- Procrastinating, leaving tasks unfinished
- "Never" / "always" perfect-behaviour claims
- Blindly agreeing with seniors, or arguing aggressively

The 3-second method

1. Trait: what quality is this? → **2. Direction**: good or bad for a professional? → **3. Strength**: "Strongly" only for core values.

Final checklist

- ✔ Read every word, especially "not", "rarely" and "avoid"
- ✔ Keep the same stand on the same trait
- ✔ Mix Agree and Strongly Agree, not all extremes
- ✔ Disagree with "too perfect" claims
- ✔ Trust your first instinct, and don't overthink
- ✔ Answer all 54, leaving none blank
- ✔ Stay relaxed, because the gamified round comes next
- ✔ Be your best professional self, not someone else

Remember

This round isn't about being perfect. It's about being **consistent, honest and professional**. If you follow this guide, you'll clear it comfortably. All the best!
